Infectious Agents and Disease
4: 286–288 © 1995 Lippincott–Raven Publishers, Philadelphia

Infectous Agents and Disease
Volume 4, 1995

Subject Index

Acquired immunodeficiency syndrome (AIDS)
  cytomegalovirus retinitis, foscarnet vs. ganciclovir, 131
  future role of pathologists, 167
  HIV vaccines, 95
  wasting syndrome, 76
Acyclovir
  resistance, by herpes simplex virus, 115
Anabolic agents
  in wasting syndrome in AIDS, 76
Ancylostoma
  hookworm, molecular pathobiology, 71
Antibodies
  immunoglobulin gene usage, in human anti-pathogen response, 153
Antifungal drugs
  aspartyl protease and beta-glucan synthesis, in candidiasis, 228
Antigens
  bacterial processing, for MHC-restricted T lymphocytes, 1
  cross-reactivity, simian herpesviruses, 55
  encapsulation, *Vibrio cholerae* O139 Bengal, 41
  Giardia lamblia surface adaptations, 161
Appetite stimulants
  in wasting syndrome in AIDS, 76
Arthropods
  blood-feeding, 143
Aspartyl protease
  in candidiasis, 228
Auxotrophy
  HGPRT as target, in protozoal infections, 29

Babesiosis
  phylogenetic analysis, 182
Bacteria
  antigen processing, for MHC-restricted T lymphocytes, 1
  gram-negative infections, recombinant BPI for treatment, 102
  meningococcus, vaccine development, 13
  RTX exotoxins, 254
  virulence, role of proteases, 47
Bactericidal/permeability-increasing protein (BPI)
  recombinant, for gram-negative bacterial infections, 1012
Beijerinck
  100th anniversary of virology, 178
Blood-feeding arthropods, 143

Candidiasis
  aspartyl protease and fungal wall beta-glucan synthesis, 228
  nosocomial, epidemiology and drug resistance, 248
Cetaceans
  morbillivirus diseases, 125
Chemotherapy
  cholera, *Vibrio cholerae* O139 Bengal, 47
  HGPRT as target, in protozoal infections, 29
  nosocomial candidiasis, 248
  proteases, in bacterial virulence, 47
Cholera
  Vibrio cholerae O139 Bengal, 41
Chorioamnionitis
  genital tract infections, preterm labor, 196
Cost/benefit analysis
  meningococcal vaccine, 13
Cross-species infection
  simian herpesviruses, 55
Cysts
  Giardia lamblia surface adaptations, 161
Cytokines
  wasting syndrome in AIDS, 76
Cytomegalovirus retinitis
  foscarnet vs. ganciclovir, 131

Distemper
  morbillivirus diseases of marine mammals, 125
DNA
  in herpes simplex virus resistance to acyclovir, 115
  hookworm, molecular pathobiology, 71
Drug resistance
  nosocomial candidiasis, 248

Editorial
  Problems in the Surveillance and Control of Viral Diseases with Special Reference to the Developing World, 171
End points
  HIV vaccine efficacy, 95
Endotoxin
  gram-negative bacterial infections, recombinant BPI for treatment, 102
Energy metabolism
  wasting syndrome in AIDS, 76
Environmental pollution
  morbillivirus diseases in marine mammals, 125
Epidemics
  cholera, *Vibrio cholerae* O139 Bengal, 41
Epidemiology
  cytomegalovirus retinitis, foscarnet vs. ganciclovir treatment, 131
  herpes simplex virus resistance to acyclovir, 115
  HIV, heterosexual transmission, 273
  meningococcal disease, vaccine development, 13
  nosocomial candidiasis, 248
  RTX exotoxins, 254

Fatty acids
  wasting syndrome in AIDS, 76
Fibronectin, fetal
  genital tract infections, preterm labor, 196
Foot-and-mouth disease
  100th anniversary of virology, 178

Foscarnet
vs. ganciclovir, for cytomegalovirus retinitis, 131

Ganciclovir
vs. foscarnet, for cytomegalovirus retinitis, 131
Gene expression
HGPRT, in protozoal infections, 29
immunoglobulins, in human anti-pathogen response, 153
Genetics
Vibrio cholerae O139 Bengal, epidemic strain of cholera, 41
RTX exotoxins, 254
Genital tract
infections, preterm labor, 196
Giardia lamblia
surface adaptations, 161
beta-Glucans
fungal wall, in candidiasis, 228

Hemolysin
RTX exotoxins, 254
Hemostasis
blood-feeding arthropods, 143
Herpesviruses
herpes simplex virus, resistance to acyclovir, 115
simian, 55
Historical Note
100th anniversary of virology, 178
Hookworm infection
molecular pathobiology, 71
Hormone function
in wasting syndrome in AIDS, 76
Human immunodeficiency virus (HIV) infection
heterosexual transmission, 273
vaccine efficacy, 95
wasting syndrome, 76
Hyperlipidemia
wasting syndrome in AIDS, 76
Hypoxanthine-guanine phosphoribosyltransferase (HGPRT)
in protozoal infections, 29

Immune response
immunoglobulin gene usage, in human anti-pathogen response, 153
meningococcal vaccine, 13
Immunocompromised patients
herpes simplex virus resistance to acyclovir, 115
Immunoglobulins
gene usage, in human anti-pathogen response, 153
Infections
candidiasis, aspartyl protease and fungal wall beta-glucan synthesis, 228
cholera, *Vibrio cholerae* O139 Bengal, 41
genital tract, preterm labor, 196
gram-negative bacterial, recombinant BPI for treatment, 102
HIV, heterosexual transmission, 273
HIV, vaccines, 95
HIV, wasting syndrome, 76
hookworm, molecular pathobiology, 71
immunoglobulin gene usage, in human anti-pathogen response, 153
morbillivirus diseases of marine mammals, 125
myeloblastosis-associated virus, 212
nosocomial candidiasis, 248
pathology future, 167
protozoal, HGPRT as therapeutic target, 29
simian herpesviruses, 55
Infectious diseases
training issues, 110
Vibrio cholerae O139 Bengal epidemic strain of cholera, 41

Labor, preterm
genital tract infections, 196
Leukocytes, polymorphonuclear
gram-negative bacterial infections, recombinant BPI for treatment, 102
Leukotoxin
RTX exotoxins, 254
Lipopolysaccharides
gram-negative bacterial infections, recombinant BPI for treatment, 102
Liver
in wasting syndrome in AIDS, 76
Lymphocytes
T, class I and II MHC-restricted, processing of bacterial antigens, 1
Lymphoid leukosis
myeloblastosis-associated virus, 212

Major histocompatibility complex (MHC)
T lymphocytes, bacterial antigen processing, 1
Marine mammals
morbillivirus disease, 125
Meningitis
vaccine development, 13
Monkey
simian herpesviruses, 55
Morbillivirus disease
of marine mammals, 125
Myeloblastosis
retroviruses, 212

Necator
hookworm, molecular pathobiology, 71
Nephroblastoma
myeloblastosis-associated virus, 212
Nutrition
wasting syndrome in AIDS, 76

Osteopetrosis
myeloblastosis-associated virus, 212
Outer membrane proteins (OMP)
in meningococcal vaccine, 13

Pancreas
in wasting syndrome in AIDS, 76
Parasites
blood-feeding arthropods, 143
Giardia lamblia surface adaptations, 161
hookworm, molecular pathobiology, 71
protozoal infections, HGPRT as therapeutic target, 29
Pathologists
future role in infectious diseases, 167
Phagocytosis
bacterial antigen processing, MHC-restricted T lymphocytes, 1
RTX family of toxins, 254
Phylogenetic analysis
babesiosis, 182
Pinnipeds
morbillivirus diseases, 125

Piroplasms
  babesiosis, 182
Platelet aggregation
  blood-feeding arthropods, 143
Polypeptides
  hookworm, molecular pathobiology, 71
Polysaccharides
  in meningococcal vaccine, 13
Pregnancy
  genital tract infections, preterm labor, 196
Primates, nonhuman
  simian herpesviruses, 55
Proteases
  bacterial virulence, 47
Proteins
  Giardia lamblia surface adaptations, 161
Protozoa
  infections, HGPRT as therapeutic target, 29
Purines
  HGPRT, in protozoal infections, 29

Retinitis
  cytomegalovirus, foscarnet vs. ganciclovir, 131
RTX (repeats in toxin)
  bacterial exotoxins, 254

Sequence analysis
  HGPRT, in protozoal infections, 29
Sexually transmitted disease
  HIV, heterosexual transmission, 273
Simian herpesviruses, 55
Surveillance
  viral diseases in developing world, 171

T lymphocytes
  class I and II MHC-restricted, processing of bacterial antigens, 1
Toxins
  bacterial RTX family, 254
Training issues
  infectious diseases, 110
Trial objectives
  HIV vaccines, 95
Triglycerides
  wasting syndrome in AIDS, 76
Trophozoites
  Giardia lamblia surface adaptations, 161

Vaccines
  HIV, measurement of efficacy, 95
  hookworm, molecular pathobiology, 71
  meningococcal, 13
Vasodilation
  blood-feeding arthropods, 143
Virology
  surveillance and control of disease in developing world, 171
  100th anniversary, 178
Virulence
  bacterial, role of proteases, 47
  Giardia lamblia surface adaptations, 161
  Vibrio cholerae O139 Bengal, epidemic strain of cholera, 41
  RTX exotoxins, 254
Virus
  herpes simplex virus, resistance to acyclovir, 115
  HIV, heterosexual transmission, 273
  morbillivirus disease of marine mammals, 125
  myeloblastosis-associated, 212
  simian herpesviruses, 55
Vision
  cytomegalovirus retinitis, foscarnet vs. ganciclovir treatment, 131

Wasting syndrome
  in AIDS, 76

Yellow fever
  100th anniversary of virology, 178
Yersinia pestis
  virulence, role of proteases, 47

Zoonotic infections
  babesiosis, 182
  simian herpesviruses, 55
